PRODUCT FEATURES

Ready to use straight out of the box the GoPlayer tablet has been designed to be safe and easy to use as we understand that when you are travelling with children the last thing you need is a complicated setup. The tablet comes with a Bluetooth remote control so that parents can control the system from the front, or allow the passengers to choose their movies on the touch screen.

In addition, the GoPlayer includes Google Mobile Services, which means that you can view from Google Play, Netflix, and many other applications. There are also USB and SD ports to allow you to play movies directly from your own library. Using a strong aluminum chassis, the GoPlayer Universal Mount is a high quality and safe mounting system.
